SUMMARY

Software engineer with 14+ years of experience building e-commerce frontends and PHP web applications. Currently leading a remote Vue.js team that builds headless Magento 2 storefronts for four UK retail brands, and driving their migration to Nuxt 3. Strong across the stack, from Vue/Nuxt frontends backed by Elasticsearch to Laravel and CodeIgniter backends, with hands-on experience setting up CI/CD pipelines and leading developers in Agile teams.

EDUCATION

Degree	Institution	Year	CGPA
MS Software Engineering	Abasyn University	2017	3.54 / 4.00
BS Software Engineering	City University of Science and Information Technology, Peshawar	2012	2.92 / 4.00

TECHNICAL SKILLS

Frontend	Vue.js (2 & 3), Nuxt 3, Vue Storefront, TypeScript, JavaScript (ES6+), Tailwind CSS, Bootstrap, Chart.js
Backend	PHP, Laravel, CodeIgniter, RESTful & SOAP APIs, OAuth2, third-party API integrations
E-commerce & Search	Magento 2 (headless), Elasticsearch
Databases	MySQL, Microsoft SQL Server
DevOps & Cloud	Git (GitHub, Bitbucket, GitLab), CI/CD (Semaphore CI, webhooks), AWS Elastic Beanstalk, Cloudflare Workers
Automation & AI	n8n workflow automation, AI-assisted development (Claude Code)
Testing & Process	PHPUnit, TDD/BDD, Postman, Jira, ClickUp, Agile

PROFESSIONAL EXPERIENCE

Frontend Architect & Team Lead

Jun 2020 – Present

Tile Mountain (UK-based company, remote)

Islamabad, Pakistan

- Lead a remote team of Vue.js developers building and maintaining the storefronts for four UK retail brands: Tile Mountain, Bathroom Mountain, Tiles247 and Walls and Floors.
- Plan and assign work in Jira and ClickUp, review code, and unblock developers on Vue.js and storefront architecture problems.
- Develop headless Vue Storefront 1.x (Vue 2) frontends on Magento 2, with the product catalogue indexed in Elasticsearch so pages render without querying Magento on every request, improving speed and scalability.
- Designed and set up CI/CD pipelines for both the Magento 2 backend and the Vue Storefront frontends, automating testing and deployment.
- Driving the migration of the storefronts to Nuxt 3.

Senior Software Engineer (PHP)

Creativetech Solutions

May 2016 – May 2020

Islamabad, Pakistan

- Built **ESIC Directory** (esic.directory), a CodeIgniter 3 CMS with a page builder powering every frontend page, investor and company listings, user and role management, and year-wise registration questionnaires.
- Wrote an embeddable JavaScript layer that served dynamic pages from the CodeIgniter app into the client's Weebly site, which cannot run server-side code.
- Developed **Billfolda**, an equity crowdfunding platform for an Australian client, in an 8-person team (Laravel 5.4, later upgraded to 5.5).
- Led the rebuild of **Hairlista** from Ning to Joomla/JomSocial, writing PHP import scripts that migrated multi-gigabyte JSON exports along with all user images and videos.
- Built a JomSocial plugin for GitHub/Bitbucket login that lets users choose which public repositories appear on their profile.
- Maintained production on AWS Elastic Beanstalk (EC2) and implemented CI/CD with Semaphore in an Agile, Jira-based team.

Senior Software Engineer & Team Lead (PHP)

Parexons

Dec 2014 – May 2016

Peshawar, Pakistan

- Promoted from Senior PHP Developer to Team Lead; split project workloads across developers and interns based on their strengths.
- Led development of **PRaHMIS** (Patient Record & Hospital Management Information System), which began under my supervision as PHIMS and was published on CodeCanyon.
- Refactored and extended a CodeIgniter-based Human Resource Management System with new modules.
- Delivered WordPress sites for clients including Stytech and Explorer.

Senior PHP Developer & Design Team Lead

Smart Bakhtar Solutions

Jan 2013 – Sep 2014

Peshawar, Pakistan

- Progressed from web designer to senior PHP developer, holding both the Design Team Lead and Senior PHP Developer roles.
- Developed modules for **Zorkif ERP**, a CodeIgniter ERP for a Saudi client, alongside four other developers.
- Built data-heavy interfaces with Kendo UI and server-side DataTables.
- Led design of websites for clients including Baran Hotel, Bost University and Afghan Folad.

Web Design Intern

Telic Technologies

May 2012 – Dec 2012

- Designed websites, brochures and catalogues, and built responsive HTML/CSS/Bootstrap layouts, including the interface of a .NET web application under TFS continuous integration.
